Table of Contents

1 User Acceptance Criteria:7

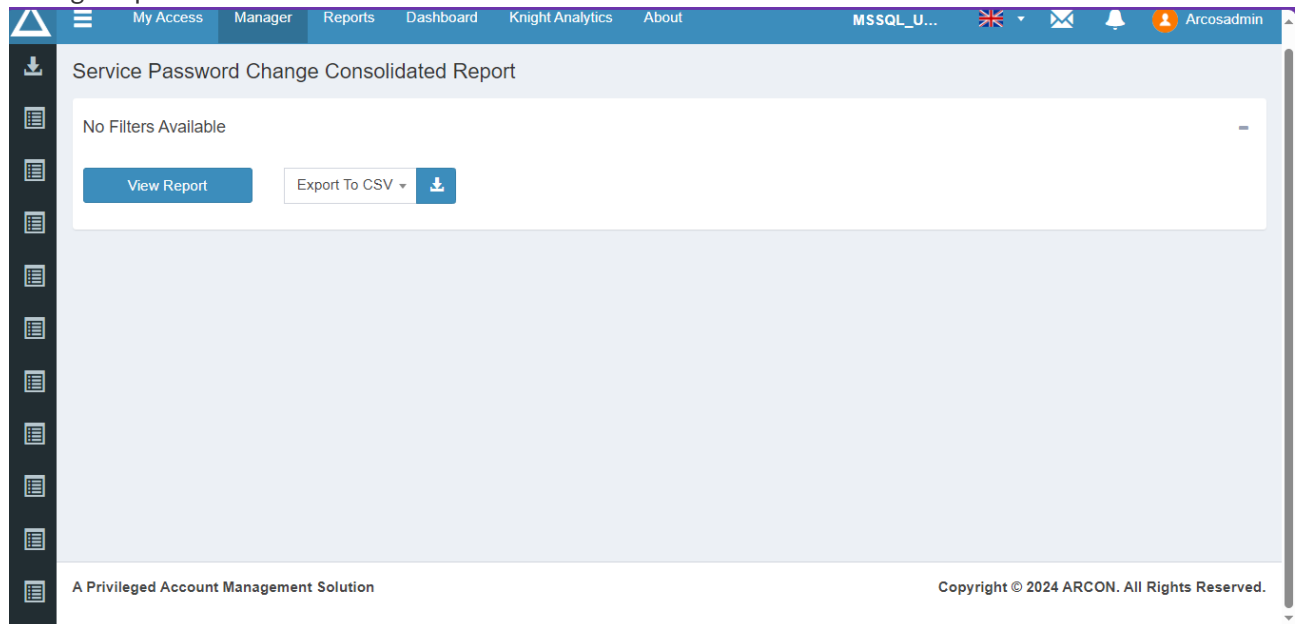

Business Requirement:

There is requirement from the client where they want to send the **Alerts and Notifications** to the users when the Passwords of the Services which are marked as critical are changed.

Current Scenario:

Currently in PAM, we do not send any Alerts and Notifications to the Admins and Users if any Password for any Critical Services is changed.

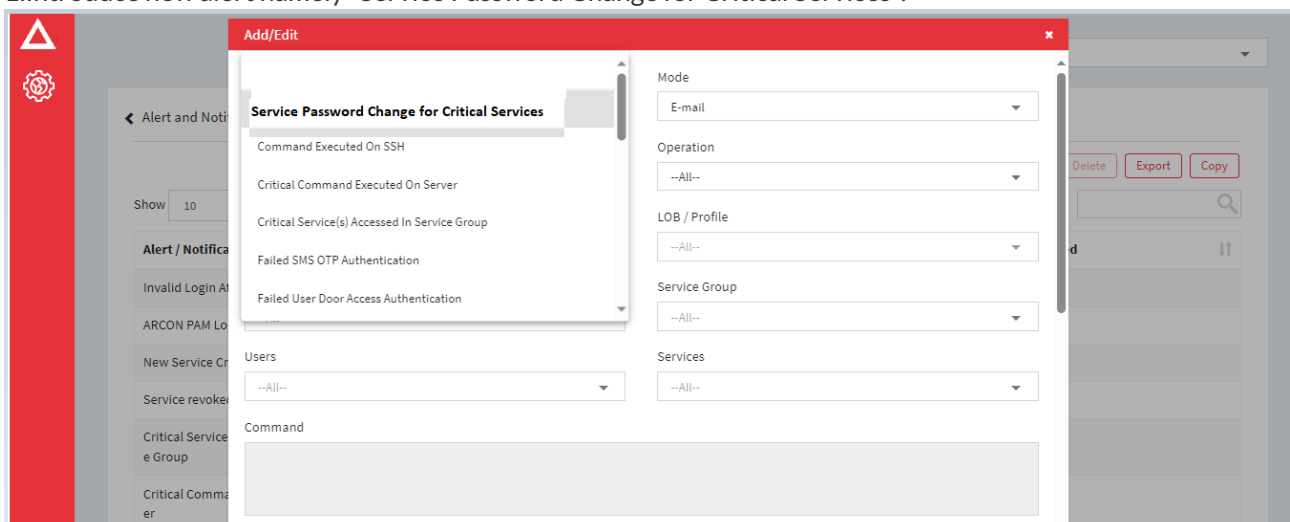

We showcase the Password change for Critical Services under Log into PAM → Report → Service Password Change Report.

However, alerts and notifications are not send to the admins and this report does not have any segregation for critical services.

Enhancement:

1.Introduce new alert namely “Service Password Change for Critical Services”.

2. On selecting the “Service Password Change for Critical Services”, the following dropdown should be enabled namely:

Lob, Service Type, Service Group, Service, Alert Sent to User and Send Alert to Group Admin, field will be enabled for selection

The screenshot shows the 'Add/Edit' alert configuration window. The window has a red header bar with 'Add/Edit' and a close button. It contains several dropdown menus: 'Alert / Notification' (User Dormancy Alert), 'Mode' (E-mail), 'Object Type' (--All--), 'Operation' (--All--), 'Service Type' (--All--), 'LOB / Profile' (FLOW TESTING), 'User Group' (--All--), 'Service Group' (--All--), 'Users' (--All--), and 'Services' (--All--). There is also a 'Command' text area and 'Threshold' and 'Interval (in min)' fields at the bottom. The 'Service Type', 'LOB / Profile', 'Service Group', and 'Services' dropdowns are highlighted with black boxes.

Based on Lob, service type and service group selected under Service Dropdown only the Critical Services which are marked as critical under Log into PAM → Manage → Apps → Server Manager → Manage Service → Service → Right click → Criticality High will be populated.

Once

Alert Send to User

--Select--

Between Specific Time

5:33 PM

To

5:33 PM

☐ Enabled

☐ Send Alert to Group Admin

☒ Send alert to user

In the "Alert Send to User" dropdown, users will be displayed regardless of the selected Line of Business (LoB).

Based on the configuration, done whenever the Password of the critical services is changed, the Alert will be triggered and send to the Users selected in "Alert Send to User".

1 User Acceptance Criteria:

1. User should seamlessly be able to Log into PAM → Manage → Settings → Alerts and Notifications and find the new alert namely “Service Password Change for Critical Services” under Alert/Notification.
2. On selecting the “Service Password Change for Critical Service”, the above mentioned fields should be enabled to select by the user.
3. Admin should seamlessly be able to configure the Alert and Notification and based on configuration saved whenever the password is changed for the critical services, the Alert will be triggered and selected user will be notified.

POC (Point of Contact) & Support Information

The product is developed and maintained by ARCON TechSolutions Private Limited. We at ARCON are continuously thriving to develop and deliver the best quality products. Being our valued customer, we would like to know your feedback, suggestions, and ideas for improvements with regard to our products and services. You can always reach out to us through the below ways of communication:

Web
